

Cybersecurity Awareness Training

Educate your employees about cybersecurity with Wizer.

Cybersecurity Awareness Training

Our training partner, Wizer, provides policyholders with unlimited employee access for the duration of the first policy year to:

- 1–2 minute training videos, including Wizer’s full content library
- Games, quizzes, and progress reports
- Phishing email simulations

Cybersecurity awareness basics:

- Enforce the use of strong passwords and avoid reusing them.
- Implement multi-factor authentication (MFA or 2FA).
- Avoid using poorly secured public Wi-Fi.
- Install security software on all devices.
- Train employees to access sensitive data only from company devices and via a VPN (encrypted) connection.

Why is training important?

Many cyber attacks, especially ransomware, rely on human error.

- Skilled cybercriminals can easily forge convincing emails that appear to come from clients, managers, or suppliers.
- It’s easy to inadvertently click on a malicious link in a phishing email.
- Resulting cyber incidents can lead to extortion (ransom), business interruption, compromised data, and more.

Offered by Wizer, paid for by Cowbell. For more information, [download Wizer’s document on how to build a cybersecurity awareness programme.](#)

How to Activate Your Training

Setting up your Wizer training programme is simple and straightforward. Follow these three steps to enable your Wizer training from the Cowbell Platform:

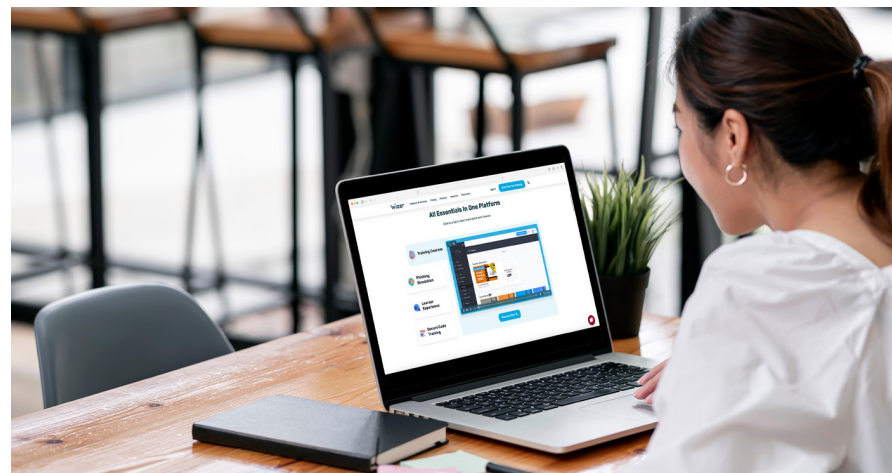

- 1 Log into the **Cowbell Platform**.
- 2 Select the **Training** tab from the left-hand menu.
- 3 Click **Enable Training**.

It may take a few moments to activate your Wizer training. You'll receive a notification once the process is complete, and your Wizer integration will display as "Connected" under the Connectors tab.

Note: The training programme includes:

- Access to 100+ microlearning videos
- Smart phishing simulator and phishing game
- Policy management, SSO, and more...

Visit **My Training** to view your current training courses. The Wizer account Admin can also manage training courses and invite users to the Wizer account.

Have additional questions? Contact our [Cybersecurity Services team](#) for any account-related troubleshooting.

Our experts are happy to explain the process in more detail and help resolve any issues.
