

Cybersecurity Awareness Training

Educate your employees about cybersecurity with Wizer.

Why is training important?

- Many cyberattacks, especially ransomware, rely on human error.
- Skilled cybercriminals can easily fake convincing emails from clients, managers, or suppliers.
- It is easy to click on a malicious link in a phishing email inadvertently.
- Resulting cyber incidents can lead to extortion (ransom), business interruption, compromised data, and more.

Offered by Wizer, paid for by Cowbell. For more information, [download Wizer's document on how to build a cybersecurity awareness program.](#)

Our training partner, Wizer, provides all policyholders unlimited employee seats for the duration of the first policy year to:

- 1-2 min training videos which include Wizer's full library of content
- Games, quizzes and progress reports
- Phishing email simulations

Cybersecurity awareness basics:

- Enforce the use of strong passwords; avoid password reuse.
- Deploy multi-factor authentication (MFA or 2FA).
- Avoid poorly secured public Wifi.
- Install security software on all devices.
- Train employees to access sensitive data only from company devices and through a VPN (encrypted) connection.

How to Activate Your Training

Setting up your Wizer training program is simple and easy. Follow these three steps to enable your Wizer training from the Cowbell Platform.

- 1 Log into the **Cowbell Platform**.
- 2 **Select the Training tab** from the left-side menu.
- 3 Click **Enable Training**.

It will take a few moments to enable your Wizer training. You will receive a notification once the process is complete, and your Wizer integration will update to "Connected" in the Connectors tab.

Note: The training program includes:

- Access to 100+ microlearning videos
- Smart phishing simulator and phishing game
- Policy Management, SSO, and more...

Visit **My Training** to view your current training courses. The Wizer account Admin can also Manage Training courses and Invite Users to the Wizer account.

Additional questions? Contact our Cybersecurity Services team if you need account troubleshooting. Our experts are happy to explain the process in more detail and address any questions you may have.
