

# Cyber Insurance

## How to get started (for AWS clients)

1

### **Contact your broker or agent to get the process started.**

You will need to answer a few questions so we can determine if we're able to provide coverage.

2

### **Activate Cowbell Connector for AWS (highly recommended)**

First, get help from your AWS administrator. He/she is the tech person who manages your accounts on AWS and will have the credentials to activate the Cowbell Connector for AWS.

3

### **Review your risk assessment (Cowbell Factors)**

Login to the Cowbell Platform to review our evaluation of your organization for cyber risk. We tell you how you compare to industry peers and

4

### **Review your recommendations (Cowbell Insights)**

Along with Cowbell Factors, review your Cowbell Insights which are unique recommendations for your organization to improve its risk profile. Implement the recommendations and optimize your premium even prior to binding.

5

### **Get your quote**

Cowbell Cyber will give you a quote based on the security configuration of your organization's infrastructure and your deployment of workloads and assets on AWS.

6

### **Purchase!**

Review your coverage options, select your deductible and enter your payment details to confirm your insurance policy.
