

Cybersecurity Awareness Training

Educate your employees about cybersecurity.

Cybersecurity Awareness Training

Our training partner provides all policyholders unlimited employee seats for the duration of the first policy year to:

- 1-2 min training videos
- Games, quizzes and progress reports
- Phishing email simulations

Cybersecurity awareness basics:

- Enforce the use of strong passwords; avoid password reuse.
- Deploy multi-factor authentication (MFA or 2FA).
- Avoid poorly secured public Wifi.
- Install security software on all devices.
- Train employees to access sensitive data only from company devices and through a VPN (encrypted) connection.

For more information, download a document from our training partner Wizer on [how to build a cybersecurity awareness program](#).

Why is training important?

Many cyberattacks, especially ransomware, rely on human error.

- Skilled cybercriminals can easily fake convincing emails from clients, managers, or suppliers.
- It is easy to click on a malicious link in a phishing email inadvertently.
- Resulting cyber incidents can lead to extortion (ransom), business interruption, compromised data, and more.

How to Activate Your Training

Setting up your training program is simple and easy. Follow these steps to enable your training from the Cowbell Platform.

1. Log into the **Cowbell Platform** and open the **Resilience Service Catalog**.
2. Click on the **(CRS) Cybersecurity Awareness Training option** and **review the AWARE plan** under **View Plans**.
3. Click **Contact Us** to submit your interest. Our Sales team will reach out to confirm your preferred training plan.
4. Once confirmed, the Sales team will facilitate the Wizer training activation for you.
5. After activation, return to the (CRS) Cybersecurity Awareness Training option and click **Go to Training** to access the Wizer portal.

It will take a few moments to enable your training. You will receive a notification once the process is complete, and your training integration will update to "Connected" in the Connectors tab.

Note: The training program includes:

- Access to 100+ microlearning videos
- Smart phishing simulator and phishing game
- Policy Management, SSO, and more...

Visit **My Training** to view your current training courses. The Wizer account Admin can also Manage Training courses and Invite Users to the account.

Additional questions? Contact our [Cybersecurity Services team](#) if you need account troubleshooting.

Our experts are happy to explain the process in more detail and address any issues you may have.

Resiliency Services

Cowbell Inc., D/B/A Cowbell Resiliency Services ("CRS") does not in any way engage in, is not licensed to engage in and does otherwise take part in the sale, solicitation and/or negotiation of insurance.
